

CENTURION

CONSTRUCTION GROUP, LLC

FAITH-BASED

Centurion Construction upholds a mission of serving the Kingdom of God through building. This not only involves the physical design and construction of worship spaces, cafes, multi-purpose rooms and classrooms; it also involves the creation and preservation of relationships with our brothers and sisters in Christ.

Through our utmost honesty, integrity and diligence, Centurion aims to partner with you in serving God through the entire construction process. As a member of the NACDB (National Association of Church Design Builders), we are equipped to share our faith-based knowledge of financing, design and construction with you, as well as our many local and national resources, to aid in this process.

At Centurion, we spend significant time actively listening and getting to know your community and congregation with a focus of enhancing your church's vision through construction. This typically occurs during several in-person planning meetings, phone conversations and site visits. It is Centurion's duty to navigate for you and your church the different building methods and best practices, all while maintaining our shared mission of stewardship and serving humbly.
