

The industrial food process industry faces challenges of sustainability, regulations, safety, environment, flow, efficiency, and hygiene. To alleviate these worries Centurion comes along side our partners to thoughtfully phase and coordinate efforts to resolve daily concerns. Throughout construction it is our priority to uphold your production levels, keep food processing areas clean, and help you maintain delivery & shipment schedules.

BUILDING EXCELLENCE

Through Partnership, Process & Design

INDUSTRIAL FOOD PROCESS

SERVING WITH PURPOSE

Centurion has specific, proven experience working within USDA guidelines for clean environments and temperature controls, installing process piping to feed production lines, rigging and installation of equipment and packaging lines, creating warehouse and raw good storage areas, and constructing locker room and offices for employees. Our extensive industrial food processing experiences encompass a diverse range of products and includes cold storage, refrigeration, IMP, ucrete, stainless steel, food industry flooring, and beyond.
